EDUCATION

University of Zambia BSc in Systems Engineering Expected Graduation: 2025 Relevant Coursework:

- Cloud Computing Distributed
- Systems Hardware Design
- Wireless and Circular Networks
- Data Mining and Warehousing
- Foundations of AI

PROFILE SUMMARY

Recently completed Systems Engineering student skilled in web development and IoT technologies. I have fundamental knowledge in backend development, System engineering, Cloud computing, linux, AI, Data Analysis and Networking. Very Eager to learn and contribute technical expertise while continuing to grow. Most importantly, I am very teachable.

VOLUNTEER WORK & RELEVANT EXPERIENCE

- Participated in the first ever Unza Innovations challenge
- Took part in the Entrepreneurship Sandbox Summer 2025 hackthon hosted by Brilliant Catalyst (Ontario Tech University)
- Participated in STEM workshops with EO Robotics gaining experience in Arduino programming and real-world tech solutions.
- Was introduced to Web3 programming during a Boot Camp. Gained knowledge in blockchain technology and smart contract design using Motoko programming language.

TECHNICAL SKILLS

- Programming Languages: Java script, python and pHP
- Tools & Technologies: Canva, and Arduino
- Web Development: HTML, JavaScript, React, Vite and Node js
- Networking: LAN/WAN, Cisco Systems.
- Machine Learning: Reinforcement learning, AI model
- Database Management: SQL, SQLite and mongodb
- IoT programming and Embedded Systems

LEADERSHIP & MANAGEMENT SKILLS

- Strong adaptability and creativity in team collaboration
- Project management experience with a focus on delivering tech solutions Negotiation and communication skills

Personal Attributes

- Strong problem-solving critical thinking abilities
- Eagerness to learn new technologies
- Passion For Team work

LANGUAGES

- English: Fluent
- Bemba: Basics
- Nyanja: Fluent

Interests & Hobbies

- Chess
- Football fun
- Pool Table
- Movie Streaming

Project previous worked on

- Smart farming system
- AI model that classifies articles
- Pakala a web based local trading platform
- Story, An AI powered Journaling web App
